Experience and References

TOWN OF SUPERIOR TRAFFIC ENGINEERING

Project/Location

Town of Superior Traffic Engineering
Superior, Colorado

Client

Town of Superior
124 E. Coal Creek Drive
Superior, CO 80027

Project Manager

Alex J. Ariniello

Date

2000 - present

Reference

Bruce Williams
Town Manager
303-499-3675

Description

Since 2000, LSC has been the Town of Superior's traffic engineering consultant. During this time, LSC has completed an update of the Town's *Transportation Plan*, which included a TransCAD model of the Town's planning area; conducted traffic signal warrant studies; speed studies; signing and striping plans; traffic calming studies; and reviewed development applications for their traffic impacts. LSC also performed all traffic modeling for a "1601" *Interchange Feasibility Study* for improvements to the US 36/McCaslin interchange, including Level of Service analyses for various interchange configurations and micro-simulations using the VISSIM computer program. In 2004, LSC planned and designed a roundabout for the Rock Creek Parkway/88th Street intersection. Since 2003 LSC has managed Superior's computerized traffic signal system through the TransLink software program which provides remote access to the Town's signal controllers.
