SUPERIOR COMPREHENSIVE PLAN UPDATE

Project/Location

Superior, Colorado

Client

Town of Superior
124 East Coal Creek Drive
Superior, CO 80027

Reference

Bruce Williams, Town Manager

Project Manager

Alex J. Ariniello

Date

2001

Description

The Town of Superior, one of the fastest growing communities in the United States, began an update of its Comprehensive Plan in early 2001. LSC was retained to update the Transportation Element. Using a QRS II transportation model of Superior and the surrounding area, LSC forecast buildout traffic volumes for various land use scenarios and roadway network configurations. Various roadway connections were analyzed and evaluated. A microscopic simulation/ animation model was used to visually display and analyze the effects of various network configurations and laneage options. The Transportation Plan included transit, bikeway, pedestrian, and street facilities and will be incorporated into the Superior Comprehensive Plan.
