## USAFA TRANSPORTATION MASTER PLAN

### Project/Location

USAFA Transportation Master Plan  
US Air Force Academy – Colorado Springs, CO

### Client

US Air Force Academy  
8120 Edgerton Drive, Suite 40  
USAFA, CO 80840

### Project Manager

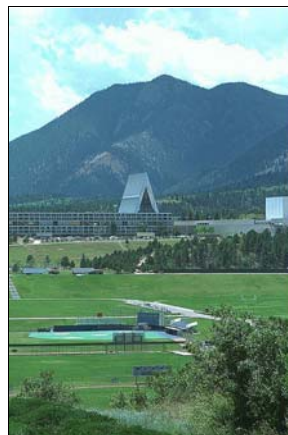

Albert T. Stoddard III

### Date

2003 - 2005

### Reference

Ms. Kit Roupé  
(719) 333-8408

### Description

LSC was selected to prepare an updated transportation master plan for the US Air Force Academy. The transportation master plan addressed issues related to Academy access and security, traffic flow at the entry gates, and traffic management for major events. Traffic control plans were evaluated and revised to manage traffic for events such as football games, graduation, other sporting events, and parents' weekend. The transportation master plan also provided recommendations for parking, particularly to accommodate the large numbers of vehicles associated with major events. Some of the challenges included maintaining public access to an educational institution while meeting the security requirements of a military installation.

Pedestrian and bicycle facilities were identified as part of the plan. The transportation plan also included designations for snow routes, emergency evacuation, and hazardous materials transportation. Recommendations and priorities for facility improvements were included as part of the plan.
