Description

Vista Academy is located north of Ridgeview Drive and west of Sheridan Boulevard in Erie, Colorado. The proposed site will contain a private school with a capacity of 250 students. LSC was retained by Vista Ridge Academy to prepare a traffic impact study of the proposed development. LSC collected traffic data, evaluated existing traffic, and evaluated current and future Levels of Service on the adjacent roadway intersections. Recommendations for drop-off and pick-up operations were made based on the results of simulation runs using the VISSIM software.
